

CARE AND USE OF LINERS AND SLEEVES

(Charcot Restraint Orthotic Walker)

CARE TIPS

- The liner, gaiter and sleeve must be carefully rolled on to the residual limb. Pulling will stretch and possibly damage the liner, gaiter or sleeve.
- To remove any air bubbles trapped in the liner, place your hands on the sides of the liner and lightly slide them from the bottom of the liner to the top a few times.
- Carefully inspect the liner and sleeve for tears or abrasions that may cause a loss of vacuum.
- Sleeves and liners should be washed weekly by hand or machine. Dry the liner with a towel, and hang the sleeve to dry.
- If the inside of the sleeve or liner feels tacky, you can dust it lightly with baby powder.
- Keep a supply of at least two good sleeves, since sleeves need to be wash
