WHATS HAPPENING AT BIONIC

BUILDING NEW CONNECTIONS IN TENNESSEE

Bionic Prosthetics & Orthotics recently attended the Tennessee State O&P Meeting in Johnson City, Tennessee, where professionals from across the region gathered to share knowledge, collaborate, and discuss the future of the orthotics and prosthetics industry. The event provided an opportunity for team members to reconnect with industry colleagues, build new relationships, and gain insight into emerging technologies and advancements shaping the future of O&P care.

A highlight of the event was connecting with East Tennessee State University's growing O&P program and its graduating class. Supporting the next generation of clinicians is an important part of Bionic's mission, and we look forward to exploring future partnerships that provide students with valuable educational, clinical, and career opportunities. By investing in professional development, industry engagement, and future talent, Bionic continues to strengthen its commitment to both its employees and the patients they serve.

DRIVING INCLUSION, ONE SWING AT A TIME

Our team recently had the opportunity to attend the Chicago Adaptive Golf Outing, where we witnessed firsthand the determination, skill, and resilience of adaptive athletes on the course. The event brought together golfers from a variety of backgrounds, all demonstrating that physical challenges are no barrier to competition, achievement, and enjoyment of the game. Beyond the golf itself, the outing provided valuable opportunities to connect with patients, community partners, and advocates who share a passion for helping individuals stay active and engaged in the activities they love.

Experiences like these reflect Bionic Prosthetics & Orthotics' commitment to improving lives beyond the clinic. By supporting adaptive sports and community initiatives, our team gains a deeper understanding of the goals and aspirations of the individuals we serve. This commitment to patient-centered care, community involvement, and helping people achieve greater independence is what continues to make Bionic a meaningful place to grow, serve, and make an impact.

EMPLOYEE SPOTLIGHT: CELEBRATING SY ROSEN'S RETIREMENT

After more than 40 years in the orthotics and prosthetics profession, Sy Rosen is retiring, leaving behind a legacy of compassion, innovation, and exceptional patient care. Since entering the field in 1982, Sy has been driven by the opportunity to help people regain their independence while solving complex challenges.

Reflecting on his career, Sy shared that while technology and craftsmanship were important, the most rewarding part of his work was building relationships with patients, earning their trust, and witnessing life-changing moments. Throughout his career, he also built two successful O&P businesses, with Stellar O&P eventually becoming part of the Bionic family.

When asked what advice he would offer the next generation, Sy emphasized that patient care should always come first. "Never forget that the device is not the patient," he said. He encourages practitioners to listen carefully, continue learning, pay attention to the details, and always treat patients with dignity and respect.

One memory that has stayed with him was receiving a phone call from a patient who excitedly shared that, for the first time, he had been able to chase his son across the backyard without tripping because of his new brace. Moments like these reminded Sy why he chose this profession. He also fondly recalls working with the Chicago Bulls during one of their championship seasons—an experience he jokingly says earned him a little credit for one of their victories.

Looking back, Sy believes that while technology will continue to evolve, one thing never changes: people come to us because they need help. Keeping that purpose at the center of the work is what creates not only a successful career, but a meaningful one.

As Sy begins the next chapter of retirement, we thank him for his years of dedication, leadership, and the lasting impact he has made on the lives of his patients, colleagues, and the entire Bionic family. Congratulations, Sy, and best wishes in your retirement!

Senior Clinical Manager, Certified Orthotist

PATIENT TESTIMONIALS

Andrew R.

Mishawaka, IN

The folks at Bionic in Mishawaka, IN are simply wonderful. They always have a great attitude and are really focused on helping people. Sangeeta is awesome

Jennie C.

Chicago, IL

Emily is such a wonderful practitioner to work with! She is so quick to respond, explains everything, and is so patient. She was recommended by my daughter's PT and is incredible. I've never felt pressured and every appointment has never been rushed. I would recommend her to anyone contemplating a helmet for their baby.

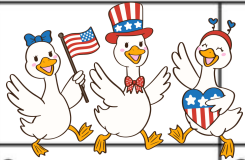

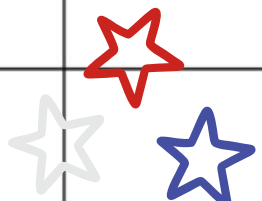

Kiley C.

Hickory, NC

Always fast, friendly, and super helpful!

Employee OF THE MONTH:

NADIA URENO

Nadia has been recognized for her outstanding work ethic, dedication to supporting patients, clinicians, and coworkers, and her consistently positive attitude. She greets everyone with a smile, creating a welcoming environment for both colleagues and patients alike.

When faced with a question she doesn't immediately have the answer to, Nadia takes the initiative to research the issue and follows through to ensure every task is completed thoroughly. Her commitment, reliability, and enthusiasm make her an invaluable member of our team. We are grateful for all she does and look forward to many more years of working together.
