

# Bionic Beats

A Monthly Publication

## Making History

We are incredibly proud and excited to share a historic milestone in our story. Bionic has become the first Orthotic & Prosthetic company in the United States to provide a patient with an Ekso Indego personal exoskeleton. This achievement also holds a deeply personal and emotional significance for our patient and his loved ones.

On his birthday, a day that was meant to celebrate his life, our patient experienced an emotional and life-changing moment. After over three years of being confined to a wheelchair due to a spinal cord injury, he was able to walk the most he has ever been able to since his accident. With his family by his side, he was able to take several consecutive steps, a truly unforgettable moment that will forever be etched in his memory.

We are beyond proud to be at the forefront of this incredible advancement, bringing cutting-edge solutions to those who need them most. It is an honor to witness such powerful transformations, and this story is a testament to the resilience of the human spirit and the incredible potential of medical innovation.

# WHAT'S HAPPENING AT BIONIC

Congratulations to Kendle Nagy in Florida for acquiring her Orthotic Fitter Assistant license! She has been an integral part of Bionic for several years working as an office administrator until deciding to become more involved with patient care. We are confident that Kendle will do great in this new endeavor.

Our team in Wisconsin had a great day at the Denmark High School, showing students how incredible the O&P field is.

Our practitioner Brian Little had a great time at Westchester Day School, NC during their Genius Hour. The kids were super excited to learn all about the world of prosthetics and 3D printing. It is always great to see how engaged they are at such a young age.

Our Greensboro location had the pleasure of partnering with WhatIsPOP to host a prosthetics disassembly day with ROMP (Range of Motion Project).

We joined the Biomedical Engineering Students at North Carolina A&T State University to disassemble donated components and learn more about prosthetics, orthotics, and pedorthics during POP month!

# EMPLOYEE of the Month:

## ***DRAGANA PETROVIC!***

***Good  
JOB.***

**"Dragana has been with us for about a year and has been an absolute pleasure to work with. Her passion for her role and dedication to patient care truly shine through. She consistently shows a genuine eagerness to learn and grow within the field. We truly appreciate her positive attitude, commitment, and the value she brings to our team."**
