

May Bionic Beats

2026

Limb Loss Awareness Month

In recognition of Limb Loss Awareness Month, our team combined innovation with meaningful community engagement. In Pembroke Pines, they partnered with FIU students to design a 3D printed below knee prosthetic module, encouraging new ideas in patient care. Vinay and Riley also attended an Amputee Support Group at the Valparaiso Library, where they connected with individuals, shared insights, and learned from their inspiring stories and experiences.

What's Happening at Bionic

We had an incredible Orthotic Technology Day at the Bionic Central office! It was a great opportunity to explore the latest innovations and collaborate with industry leaders. A big thank you to Elevate Movement, Myomo, and Spentys for joining us and sharing their expertise. Their contributions made the day both inspiring and impactful.

The Bolingbrook team had a wonderful time participating in the Easter Egg Extravaganza hosted by the Will County Health Department. They connected with many families throughout the event and enjoyed seeing hundreds of excited kids taking part in the festivities. It was a fantastic opportunity to engage with the community, share what we do, and build meaningful connections. Events like this are a great reminder of the importance of community involvement and outreach.

hello

Patient Testimonials

Julie S. **Elkhart, IN**

Great people.

Sangeeta was amazing. The inserts are well made - She helped me select the ideal shoes. I always go here for orthotics.

John W. **Melbourne, FL**

Staff was very knowledgeable, professional and helpful. Very helpful recommending best practices for care of the orthotic and personal safety and well being. I highly recommend this to anyone in need of prosthetics.

Brittany L. **Addison, TX**

Libbi was amazing and a pleasure to work with my son's head looks perfect! Thank yall for your hard work!

Employee of the Month

DYLAN ACKE

“

Dylan is extremely responsive, polite, able to problem solve and push things when necessary. He has been doing a fantastic job with constant changes and challenges around him.

”

“

Dylan is communicative, positive, and creative. He often thinks of custom solutions for some of the more complicated patients.

”

“

Dylan is very responsive, stays on top of his projects and has always been able to get me info regarding fab status of any project, 3D printed or otherwise.

”
