BionicBeats

NOVEMBER 2026

What's Happening

In October, we had the opportunity to participate in the American Society of Hand Therapy 2026 conference, sharing insights on how therapy and orthotic/prosthetic providers can work together to support long-term patient care. The event gave us an opportunity to exchange ideas, connect with fellow professionals, and discuss collaborative approaches to improving patient outcomes.

Thank you to the Occupational Therapy Department at Valparaiso University's College of Nursing and Health Professions for the opportunity to contribute to these conversations.

What's Happening

Over three days, we had the chance to encourage elementary, middle, and high school students to learn about prosthetics and orthotics and explore career opportunities in the field. Students had the opportunity to view an upper-extremity prosthesis and ask questions about our work.

The experience introduced students of different ages to a profession they may not have previously considered. One high school student even said, "I think I just found my dream job!"

Patient Testimonials

"It's been one year since I lost the lower part of my right leg. The nurse at the hospital recommended Bionic for my prosthetic care. Meeting with them was a positive and reassuring experience. They were there for me from the beginning and I know they will be there for me. I will recommend Bionic to anyone who needs prosthetic care. Thank you Eric and Melissa."

"The whole team is absolutely amazing !! I've been coming here for about 5 years for multiple prosthetics and they have been so amazing and their communication is top notch ! They are so understanding and work with I highly recommend them !"

They are always nice and helpful. They make the best orthotics I've had in decades and are affordably priced!"

"From my first call speaking with Melissa, the warm greeting when I checked in, and the thorough explanation of the brace, professionalism, and kindness N'Jhari showed went above and beyond what I expected. I would highly recommend you all to anywho who needs your services. Thank you!!"

PATIENT

SUCCESS

Our 90-year-old patient reached a meaningful milestone in his prosthetic care, standing from his wheelchair and walking with minimal assistance. This moment reflects the effort he has put into his rehabilitation and the support of his care team.

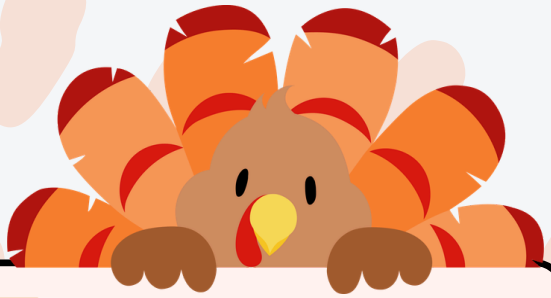

Progress looks different for every patient, and achievements like this remind us why we do what we do. We're proud to support him as he works toward greater mobility and independence, celebrating each step along the way.

Employee of the Month

Jacob Watters

Jacob Watters, CPO, has shown exceptional dedication to patients and teammates across the KY/TN region. He recently stepped up to cover the Owensboro and Evansville clinics while continuing to care for his patients in Clarksville, TN

.

Through added travel and responsibilities, Jacob has remained flexible, dependable, and focused on ensuring patients receive the attention they deserve. His positive attitude and willingness to help have made a meaningful difference to the clinics he supports.

Thank you, Jacob, for your hard work, teamwork, and continued commitment to patient care!
