What's Happening at

It was such a pleasure have Sheila with us. Our hopes for her is that she keeps learning, growing, and making a difference. We wish her great success in everything ahead!

From Sheila:

I'm excited to share that I completed my internship at Bionic Prosthetics & Orthotics Group LLC! It has been great as a Biomedical Engineering graduate to step into a clinical environment and see how engineering, manufacturing, and patient care come together. I gained hands-on exposure to prosthetic and orthotic adjustments, digital scanning, additive manufacturing, and clinical troubleshooting. I'm very grateful to Jignesh V. Parmar, L/CPO, MPO and the Bionic P&O team for allowing me to learn from them and gain a new perspective on problem-solving and patient-centered care. Thank you for this memorable experience!

BACK TO SCHOOL

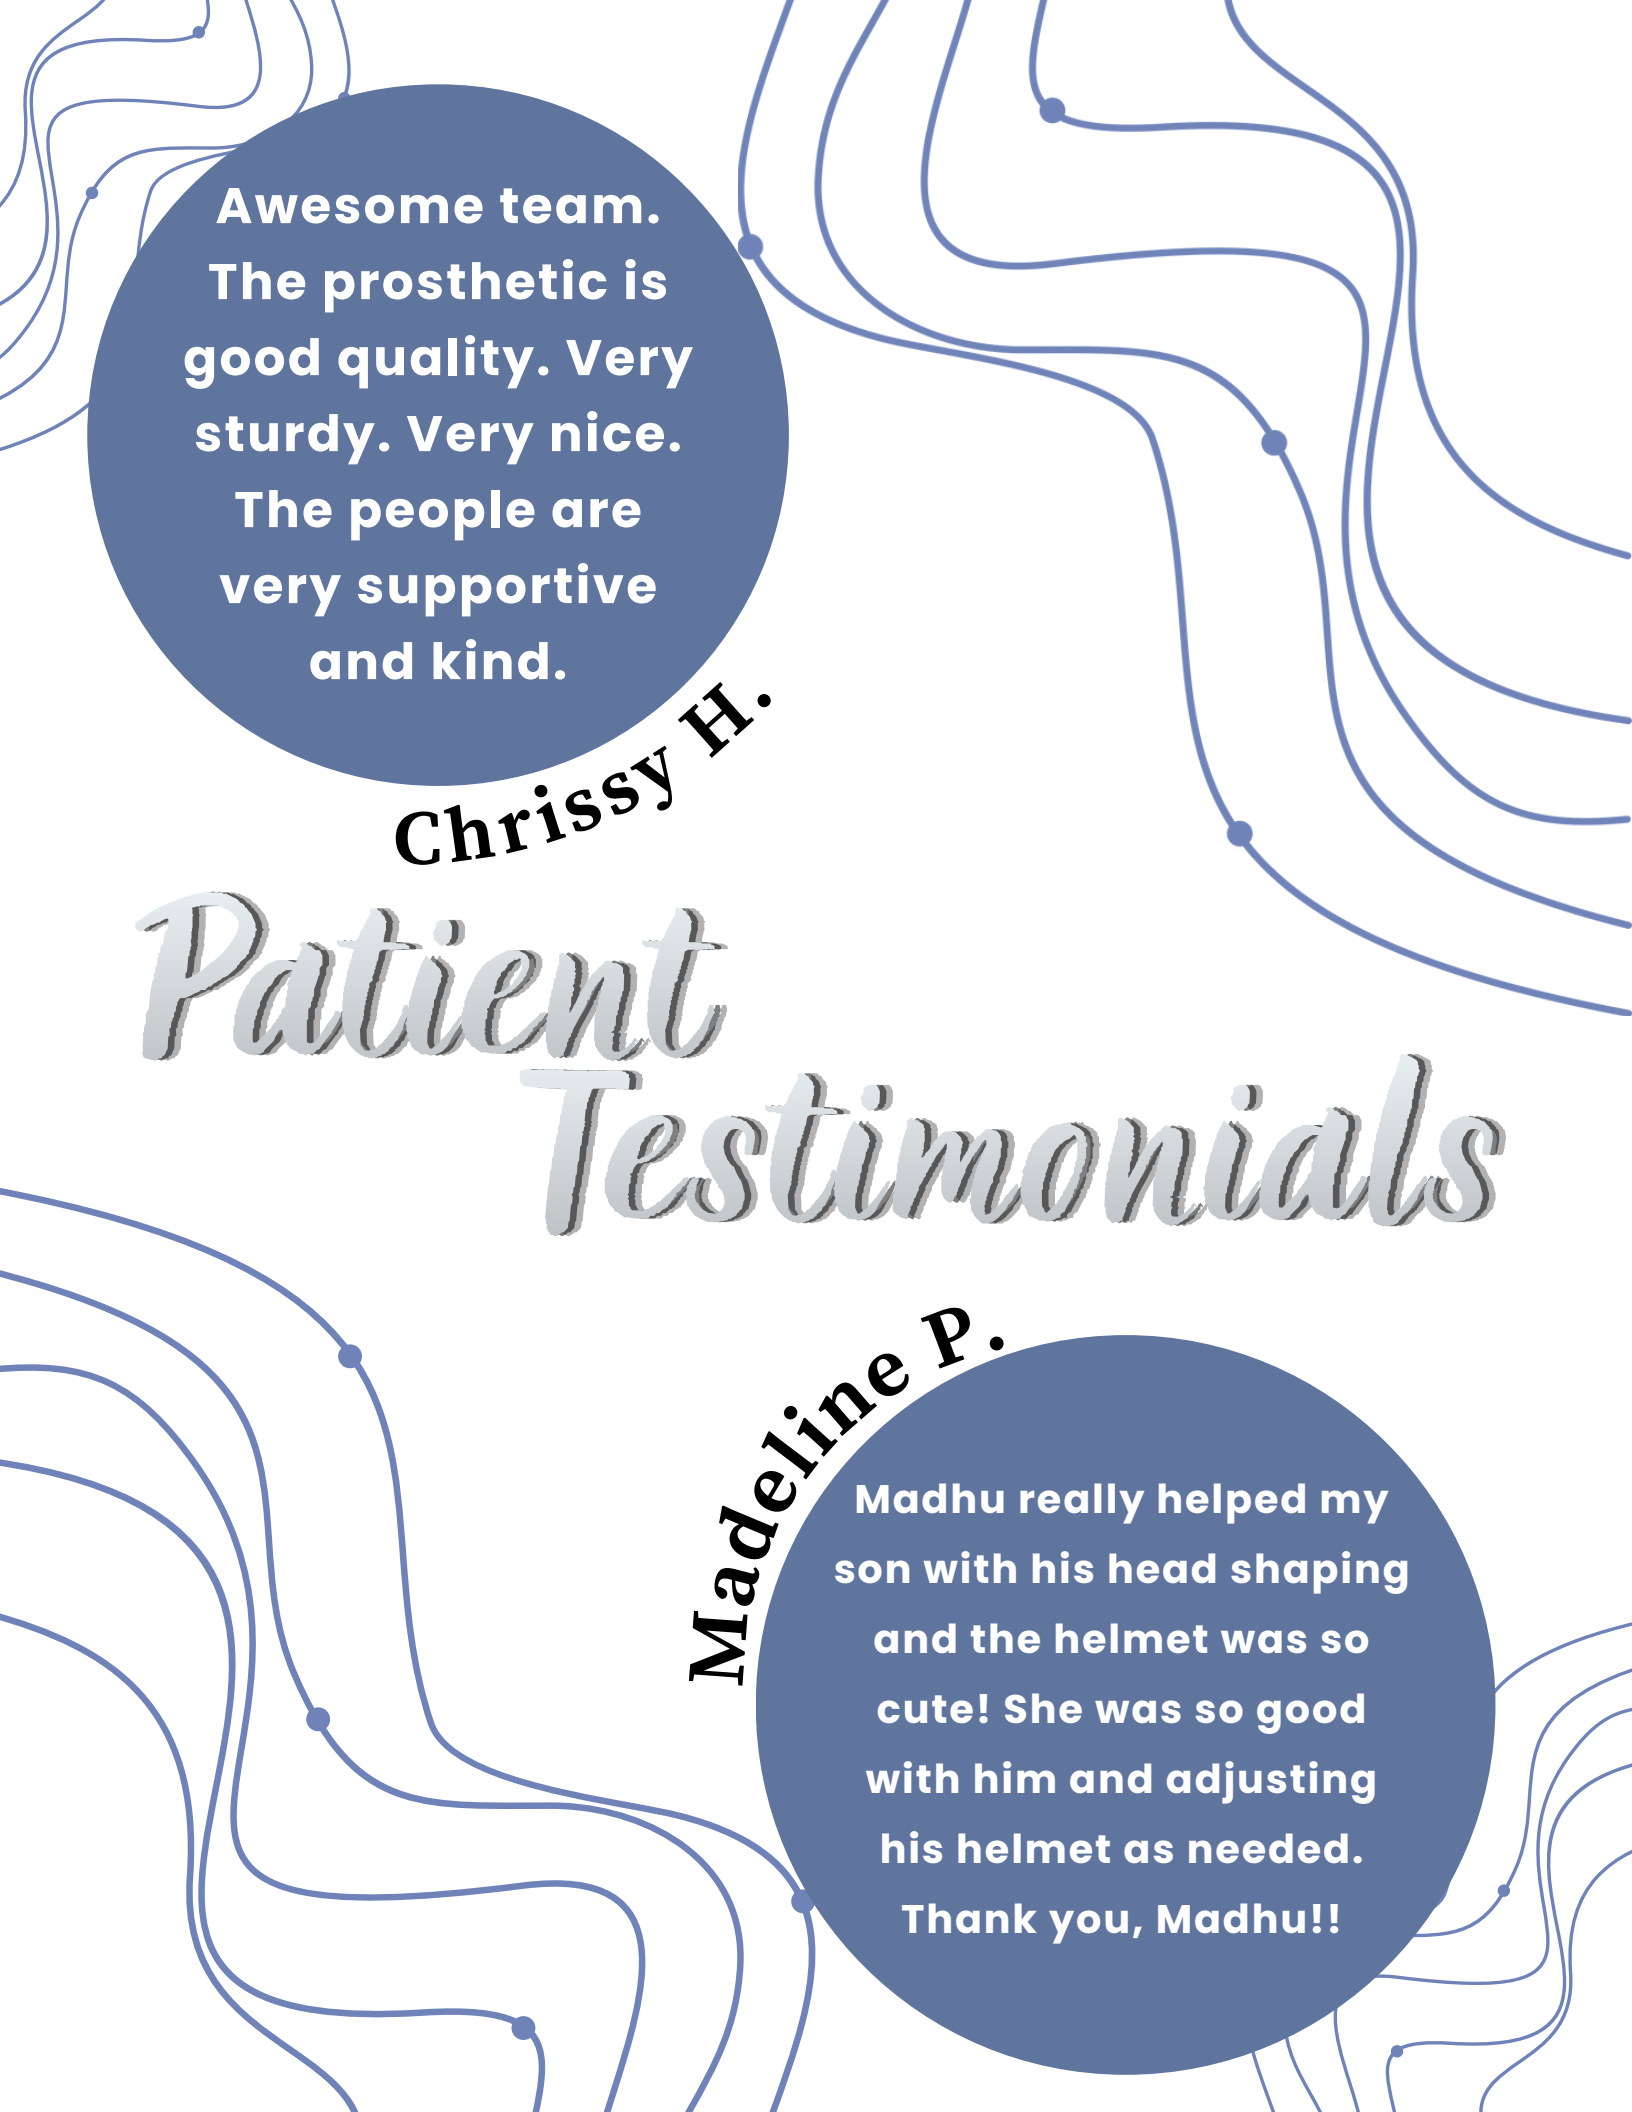

Giving Back to Our Community!

Making a difference extends beyond the care we provide to our patients. We're proud to support the communities we serve and help create opportunities for individuals and families to thrive.

Our team was happy to donate school supplies to help students head into the new school year feeling prepared, confident, and ready to learn.

We're grateful for the opportunity to give back and support as another school year begins. Here's to a year filled with learning, growth, and new possibilities!

**Awesome team.
The prosthetic is
good quality. Very
sturdy. Very nice.
The people are
very supportive
and kind.**

Chrissy H.

Patient Testimonials

Madeline P.

**Madhu really helped my
son with his head shaping
and the helmet was so
cute! She was so good
with him and adjusting
his helmet as needed.
Thank you, Madhu!!**

Patient Success Story

David
Peterson

When David came to Bionic, he was welcomed with a team that listened to his concerns and worked alongside him throughout his journey. David was appreciative for the positive attitude, open communication, and genuine dedication our team demonstrated during each of his visits.

One of the biggest advantages David experienced was our in-house fabrication capabilities. With our real-time adjustments during his appointments, we were able to fine-tune his prosthesis for optimal comfort, function, and performance. Those immediate modifications helped to make sure he left each visit feeling more comfortable and confident.

For David, this experience wasn't just about receiving a prosthetic but rather building a partnership with a team committed to helping him achieve his goals. His story reflects our personalized, patient-centered approach that defines care here.

We are grateful to be part of David's journey and remain committed to helping every patient!

Employee of the Month

Melinda Sico

Melinda is caring, hard working, dedicated, detailed, and always willing to assist where needed. Her patients and clinicians love her. When Melinda is asked to help in any area, she has always been quick to say yes. On top of that, she never complains. Melinda is an asset to the Bionic Family and we are very happy to have her. Thank you Melinda, for all that you do for us!

— Keep Up the Good Work! —
